

PITCH DECK — 2026

FIGHTVEX

AI FIGHT INTELLIGENCE FOR THE **UFC**

Transparent predictions. Real odds. A track record you can actually verify.

THE ONE-LINER

WE SIMULATE THE FIGHT **BEFORE** IT HAPPENS.

FightVex runs every UFC bout through an AI engine **50,000 times** — then hands fans and bettors the tools, and the proof, to use it. No black box, no hype.

PREDICT

Win %, method and round for every fighter on every card.

ANALYSE

Real stats, a transparent skill read, and a plain-English “why”.

BET SMARTER

Live odds, value signals and EV / CLV / bankroll math.

WHY IT EXISTS

PICKING FIGHTS IS **BROKEN.**

01

EVERYONE'S GUESSING

Gut feeling and highlight reels — no honest, data-driven read.

02

TIPSTERS DODGE THE SCORE

Winners get posted, losers get deleted. No tamper-proof record.

03

THE DATA IS SCATTERED

Striking, takedowns, layoffs, odds, weigh-ins — never in one place.

04

THE HOUSE KEEPS THE EDGE

Casual bettors pay the vig and can't see where the value is.

FIGHTVEX — ONE TRANSPARENT ENGINE, REAL TOOLS, A RECORD YOU CAN CHECK.

HOW THE VEX AI THINKS.

1

START WITH REAL DATA

Actual fight stats per fighter — strikes, takedowns, knockdowns, control, finishes.

2

BUILD A TRANSPARENT RATING

A skill profile across striking, wrestling, grappling, cardio, durability — adjusted for opposition.

3

SIMULATE 50,000 TIMES

A round-by-round engine plays the fight out: where it's fought, fatigue, damage, finish paths.

4

CALIBRATE THE ODDS

Tuned on thousands of results so "65%" really happens about 65% of the time.

5

ADD FIGHT-WEEK SIGNALS

Short notice, missed weight and injuries — what the market is slow to price.

WHY TRUST IT

PROOF, NOT PROMISES.

LEAKAGE-FREE BACKTEST

The live engine re-graded on 10,206 real bouts — rebuilt from prior fights only, no hindsight.

BITCOIN-ANCHORED PICKS

Each card's picks are hashed onto the blockchain — proof they weren't back-dated.

PRE-REGISTERED RECORD

Every pick logged before the fight. Wins and losses both stay public.

BEATS THE CLOSING LINE

We track the model vs where the market closes — the sharpest test of edge.

REAL DATA ONLY — NOTHING FABRICATED, ESTIMATES LABELLED.
